DETAILED ACTION

1. This office action is in response to communication filed on 9/11/08. Claims 39-41 have been added. Claims 1-41 are pending on this application.

Response to Arguments

2. Applicant's arguments with respect to claim 1-39 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. Claims 39-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. A computer program product embodied on a computer-readable medium was not disclosed in the specification.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim(s) 1-18 is/are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory "process" under 35 U.S.C. 101 must (1) **be tied to another**

statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.

Claims 19-38 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. Examiner fails to see the utility of generating the limited transmissible signal as claimed in light of the specification.

Claims 39-41 are rejected under 35 U.S.C. 101 because the claimed invention is directed to **statutory** subject matter. Claims 13-18 are directed to **"a computer readable medium encoded with a data processing program"**. According to the USPTO Interim Guidelines for Patent Subject Matter Eligibility, computer programs are neither computer components nor statutory processes, as they are not "acts" being performed nor do they define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized.

Applicant should note, however, that claims directed to a claimed computer-readable medium encoded with a computer program is a computer element which defines structural and functional interrelationships between the computer program and the rest of the computer which permit the computer's functionality to be realized, and is

thus statutory. Claims that recite the following language:

"A computer-readable medium encoded with a computer program..."

"A computer-readable medium having stored thereon instructions for..."

are considered to be product claims and are thus, **statutory PROVIDED** the specification does **NOT** disclose that the computer-readable medium is a signal, waveform, or carrier wave
